AMERICAN MACHINIST

A PRACTICAL JOURNAL OF MACHINE CONSTRUCTION.

INDEX FOR VOLUME 20, 1897.

Illustrated articles are marked with an asterisk (*). Reviews of books are marked with a dagger (†). Questions and answers have the serial number in parentheses ().

A

*Acetylene gas explosion, an. E. A. Gay... 843, 888
Accidents, the distribution of... 667
Accuracy of machine tools. T. Roberts... 743
*Addition diagrams, a method of constructing. Henry Hess... 600
Adiabatics. De Volson Wood... 419
Advertising, machinists'... 912
Advice for nothing, getting... 418
gratis. Samuel Webber... 477
"Aerine," or liquified air. Ed. A. Rix... 415
Agent, the opportunity of the patent... 782
Air refrigeration, compressed. Frank Richards... 52
in New York, compressed... 62
cars, speed test of compressed... 83
on men-of-war, proposed extension of the use of compressed. F. W. Bartlett... 138, 153, 169
compressor, arrangement of three-stage (24)... 161
compressor, size of (41)... 278
compressor, size of (81)... 406
-brake pump, the steam diagram of the. 284
for foundry cupolas, volume and pressure of... 298
passing through an opening, formula for calculating the quantity of (57).. 333
temperature of re-expanded compressed (58)... 333
*locomotive for the Manhattan Elevated Railroad, compressed... 340
horse-power of compressed (75)... 387
horse-power of compressed (117)... 573
Aerine or liquified. Ed. A. Rix... 415
fog trumpets run by compressed... 448
computing the power of compressed. H. G. C... 475
and electric motors, steam... 488
power of portable compressed. Frank Richards... 566
explosive force of compressed (117)... 573
transmission of power by compressed... 620
locomotive, trial run of the Hardie compressed... 647
on the "Terror," the success of compressed... 683
a practical indorsement of compressed. 703
compressor, get the. Tecumseh Swift.. 740
resistance... 736
engines, peculiar action of compressed (156)... 801
preservation of liquid (180)... 967
explosions, compressed. Frank Richards... 971
Allibone, offensive behavior of Lieut... 181
Allowance for press fits. "Teri"... 176
Aluminum, melting heat of (20)... 161
melting heat of (91)... 441
bend or break, will (51)... 315
output, the world's... 377
*machinery bearings of. F. A. Farnsworth... 479
Aluminum zinc and aluminum tin copper alloys, strength of. Prof. R. C. Carpenter... 677
manganese and silicon in the brass foundry, the value and use of. F. J. Davis... 679
"American Machinist," principles and policy of the... 91
American machine tools and other products as seen through foreign eyes... 182
*machine tools criticised by an English engineer. H. Austin... 237
machine tools, an English criticism of.. 240
vs. foreign machines. Prof. A. G. Webster... 241
tools, foreign copies of. Warner & Swasey... 242
made instruments of precision. D. C. Jackson... 310
machine tools abroad, growth of the sale of... 323
manufacturers at the Brussels Exposition 351
Institute, fair of the... 351, 461
and other machinery abroad (Ed. correspondence)..353, 371, 389, *407, 425, 443, *463, 483, 501, 519, 537... 577
machinery, a European distributing center for... 378
machinery to be used on the Panama Canal, no... 385
*lathes, English and. Wm. Sellers... 437
lathes. Walter Gribben... 497
machinery possible outlets for. A. F. Tennille... 692
news in France via England... 726
machine tools in England... 969
*Angle gage, an English. "Keno"... 311
*Annealing box, molding a large. A. L. Bowen... 836
Anvil face, method of tempering (53)... 315
Apprentice, Harding's. F. G... 570
Apprentices, the shop for... 40
*Arbor, a gear blank. "J. P."... 236
Arbors, dimensions of standard (1)... 19
Arithmetic in the shop. G. T. C... 762
speeding up by. Wm. Green... 819
speeding up by. Casberg... 857
speeding up by. R. J. Hearne... 887
*Arm proportions, gear. Henry Hess... 319
*Armature, coils, the construction of. Wm. Baxter, Jr... 493
and commutator insulation. Wm. Baxter, Jr... 546
*disks by machine, stacking. Geo. D. Rice... 588
*cores, on the construction of. Wm. Baxter, Jr... 606, *638, *658
*cores, the construction of jigs for drilling holes in the end rings of. Wm. Baxter, Jr... 693
*cores, dies for punching blanks for grooved. Wm. Baxter, Jr... 716
*Armatures and other rotating parts of machinery, balancing. Wm. Baxter, Jr. 85
*Armatures, winding drum. Wm. Baxter, Jr. 557
Armor plate plant, cost of an... 110
plant, appointment of board to ascertain the cost of a Government... 610
plant, a Government... 894, 949
plate at reduced prices... 641
plates, an official and an unofficial test of... 930
Armories, French (Ed. correspondence)... 519
Arms or legs, practical mechanics without.. 187
manufacturing, in Belgium (Ed. correspondence)... 501
*of fly-wheels cast in one piece, the. Henry Hess... 600
straight or curved pulley (143)... 726
Arsenal, Woolwich (Ed. correspondence)... 425
Art of questioning, the... 350
Arts, lost or buried... 140
†simplified, the mechanical... 405
of University of Nebraska, the School of Mechanic... 795
Assembling machines without oil. Tecumseh Swift... 347
*Attachment, multiple drilling... 581
*multiple drilling. John D. Riggs... 645
Australian gap lathes. Morris Fulton... 797
Australia, lathes in. Wm. H. Speechley... 780
Automata, some remarkable. W. F. Durfee. 672
Automotor cars in London. W. H. Booth. 900
Average, in defense of the... 592
*Axles, quartering keyway cutter for locomotive. Newton Mach. Tool Works. 545

B

Babbitting shafting (107)... 517
*Balancing armatures and other rotating parts of machinery. Wm. Baxter, Jr. 85
reciprocating parts of engines. J. B. Stanwood... 177
*reciprocating parts of engines. C. A. Matthey... 256
Ball bearings for grinding machines. "Easy Way"... 57
formula for weight of (7)... 63
traveling in a circle, path taken by a (25)... 161
Balls, making hollow steel. J. L. Lucas... 817
weight of cast iron, G... 120
sale of steel... 623
Bars, boring. C. Sprague... 80
*some points about boring. F. J. Woodhurst... 81
Baseball, the dynamics of... 822
Battery for producing ignition spark (48).. 315
Beams, fibre stress in (80)... 405
Bearing, test of the Hyatt roller... 466
*an adjustable ring oiling quarter box. Connersville Blower Co.'s... 848
Bearings and lubrication... 244
cast iron for. "Glasses"... 331
cast iron for. "Cast Iron"... 385
in England, use of cast iron. Jas. Vose. 367
*broaching babbitted. E. Lawrenz... 476, 625

PAGE

Bearings, broaching babbitted. "Quirk". 569
*of aluminum, machinery. F. A. Farnsworth 479
comparative test of roller 794
lubricating crank pins and. A. J. Renwerk 853
white lead and oil for. A Boston Toolmaker 908
*Belt lacing. Frank W. Parker 159
shifters. H. E. Ferry 39
*shifter, a patent 288
which side of a pulley on which to run (143) 726
*shifter, a pneumatic 734
direction of splices in a (77) 405
how to remove oil from (112) 553
caught by a 696
*tightener, a new. W. L. Chipleys 795
adheres to face of a pulley, why a (170). 893
arm torn off by a 895
horse power of (178) 967
Belting, breaking strain of a strip of leather. 342
a new formula for determining the width of leather. J. J. Flather 814
advance in price of leather 895
Bement, death of Wm. B. 783
*Bench milling machine, a small. A. H. Cleaves 490
Bessemer process, the inventor of the 440
*Bevel protractor, a new. Coffin & Leighton's 87
*gage, depth and. Sawyer Tool Co.'s.. 517
*Bicycle hub-forming machine. Prentiss Tool & Supply Co.'s 55
*spoke threading machine. Geometric Drill Co.'s 89
*spoke threading machine. Detrick & Harvey's 168
*frame joint stamping. W. A. Warman and Thomas A. Dicks 145, 165
*work, magnetic chucks for. O. S. Walker's 327
history and development of the. Leonard Waldo 421
tests of the efficiency of the. J. G. D. Mack 422
*chain link presses. E. W. Bliss Co.'s.. 504
*designs for steel connections for wood frame. W. A. Warman 560
*hub machine, a. Bardons & Oliver's.. 584
wheel for wagons, a (151) 801
*wheel for wagons, a. Arnold Metal Wheel Co 874
*rims, multiple spindle drill for. J. I. Warman's 977
†Bicycles and tricycles 162
humbug about 168
comparative friction of chains and gears on 656
*Binding and filing the "American Machinist." Wm. Pilton 798
*Blacksmith shop, a second floor 809
Blacksmithing, the details of. Jas. F. Hobart 891
*Blanks, trimming wrench. W. A. Warman. 605
Blood, death of Aretas 913
Blowing into a steam pipe, death from 153
*engine, an American. E. P. Allis Co.'s 208
Blue steel, method to (28) 181
print paper, method of making (30) 181
print paper, method of making (82) 418
*print paper, preparing. W. H. Sargent. 470
*print tables, standard (for illustration see page 535) 517
prints, red ink for (90) 441
prints 534
prints, paper for making reverse (150).. 801
Boat, the latest roller 716
a gliding 795
a gliding. F. F. Hemenway 836
a gliding. A. L. S. 887
*Boiler, a home-made 42
elaboration of detail in operating the Belleville 96
*a gas-burning water heater or steam. John S. Coe's 213
*the Philadelphia water tube 255
bursting test of a high-pressure 295
safe pressure for (68) 370

PAGE

Boiler bracing, experiments in. Francis J. Cole 419
pressure used in testing (108) 536
experience, some steam engine and. A. L. Bowen 550
*the Watson radial water-tube 713
explosion of a 913
tests, classification of data and plotted results. W. W. Christie 925
setting, a. G. W. Bissell 927
*explosion and its lessons, a terrible... 933
Boilers, water-tube 18
mechanical circulation in steam 40
†steam 244
†practical management of engines and.. 315
a new way to feed. Q. & C. Co.'s 448
method adopted by French navy for preservation of 764
†constructed by Yates & Thom 986
*Bolt, repairing an anchor. Chas. A. Hague. 46
*Bolts, anchor. Hugo A. Hecker 119
*from turning, holding planer. Chas. S. Beach 571
Bookmakers 668
Boring bars. C. C. Sprague 80
*bars, some points about. F. J. Woodhurst 81
long cylinders, method of (18) 141
long cylinders. H. Binsse's 167
*machine, new horizontal. Pearson Machine Co.'s 193
*molds for printers' rolls, machine for. Henry Binsse's 233
*bars, cutters for. "Quirk" 291
*machine, large cylinder. Niles Tool Works 325
*drilling and milling machine, Universal. Bement, Miles & Co.'s 335
*mill job as a trade secret, a 754
*tools for lathes. R. Grimshaw 856
*Boxes, adjustable packing, for journal 192
Brake shoe, pressure required on a railroad (139) 706
Brains in the machinist's trade. C. O. Griffin 699
Brass castings from sheet brass (22) 161
hardening (143) 725
Brasses, use of lead and tin in journal (143). 726
*Brass-workers' cabinet lathe, a. Springfield Machine Tool Co.'s 847
Brazing, use of graphite for 703
British frankness again—American tools... 192
*Broach broaching gears, a. J. L. Lucas.. 177
*Broaching machine. W. P. Davis 78
*machines. Rudolphi & Krummel's 358
*babbitted bearings. E. Lawrenz....476, *625
*Brush holders. A. R. Harris 379
Buildings, dustless. C. J. Woodbury 928
*Burner, for the shop, a compressed air oil. W. L. Miggett 136
Burns, a simple remedy for. A. E. Guy 739
Business efficiency, the engineer's lack of.. 107

C

Cable, breaking of clock 500
Cables, life of wire (176) 967
*Cabs, the New York electric hansom. Hugh Dolnar 511
Calculating machine, a "German." Geo. B. Grant 198
†Calculus for the engineer, the 705
*Caliper, inside micrometer. L. S. Starrett Co.'s 711
*with adjustable zero line, micrometer. L. S. Starrett Co.'s 835
*screw thread, micrometer. J. T. Slocomb & Co.'s 866
*Calipering a kettle. J. F. Hobart 257
Calipers, to demagnetize (36) 221
*divider points for Vernier. Machinist.. 971
*Can, a new oil. Robt. McVicor's 740
*Canadian example of heavy fly-wheel construction, a 412
Canal, no American machinery to be used on the Panama 385
Canvas to faces of pulleys, to fasten (166)... 893
Car, present status and prospects of the motor 506

PAGE

*Car scales, special. W. H. Sargent 562
motor, the Patton 931
Carbolic acid for tempering 195
Carbon in iron and steel, amount of (130)... 687
Carborundum powders. Colcord & Sanderson 819
Carriage, practical testimony on the motor.. 8
Cars, speed test of compressed air 83
for London, American 370
for Waterloo Underground Railway, London, American 612
in London, automotor. W. H. Booth.. 900
Cary, death of Alanson 725
*Case for small twist drills. Weiss Bros.... 382
hardening, directions for 893
Cast iron prejudice 140
iron lathe spindles and crosshead pins. G. 177
iron bearing surfaces. C. O. Griffin 212
†iron, metallurgy of 243
*iron for hardness, a novel method of testing 245
*iron, good wear of. J. H. Dunbar 277
iron for bearings. "Glasses" 331
iron bearings in England, use of. Jas. Vose 367
iron, computing the strength per square inch of. Thos. D. West 456
iron, computing the strength per square inch of. E. D. Estrada 549
*iron milling cutters. E. A. Gay 492
*iron, some notes on. J. H. Dunbar.... 514
*elliptical gear, a. Ezra Estep 515
iron Y branch pipe, how to strengthen a (109) 536
iron plates, thickness of (120) 593
iron under impact. W. J. Keep 926
Casting planer platens. Bement, Miles & Co. 39
*a pattern for a difficult brass. Chas. H. Allmond 125
*a difficult. Robert King and L. C. Jewett 439
*peculiar crack in a. Wm. Hollingsworth 457
*line rolls in chills. Geo. O. Vair 475
that difficult. Henry O'Neil 496
*extraordinary. Franklin Mfg. Co.'s 505
*a furnace door lining. W. Newton 981
Castings for electric motors (2) 19
*molding and gating steel. Geo. O. Vair 23
*chilled. L. C. Jewett 37
shrinkage of steel (31) 201
*a peculiar method of "feeding." Geo. O. Vair 292
spongy brass (67) 370
in cooling, volumnar contraction of. Francis Schumann 421
recipe for acid pickle for brass (87) 441
in Germany, prices of. Robt. Grimshaw 665
*skimming. R. D. Moore 696
Catalogs in foreign languages 552
sizes of standard. T. R. L. 589
Caveat, the. Henry F. Noyes 941
Cement for polishing wheels (26) 181
receipt for quick-drying (52) 315
Census, the brag of the 521
*Center, helping the crank over the 131
*helping the crank over the. Morris Fulton 258
*which holds the work together, a lathe. Chas. A. Rogers 681
*Centering lathe work. O. C. Crane 384
*A. H. Cleaves 615
*tool, a new. Morgan Johnson's 755
Centers, lathe. (Ed. correspondence) 484
Centrifugal force, due to earth's rotation, upon a man weighing 150 pounds, effect of (157) 802
Chain, bicycle (72) 387
*link presses, bicycle. E. W. Bliss Co.. 504
Chains and gears on bicycles, comparative friction of 656
Charity at its best 306
Cheapness, the reproach of. Tecumseh Swift 979
†Chemistry, the tutorial 162

PAGE

*Chills, casting line rolls in. Geo. O. Vair.. 475
Chimney draft. J. A. Lesourd..... 944
Chimneys, proportions of (161)..... 841
Chip of the twist drill, the divided. Tecumseh Swift..... 330
Chips, the making of. Tecumseh Swift.... 92
the making of. John E. Sweet..... 119
the making of. Morris Fulton..... 136
easy rolling. Tecumseh Swift..... 115
helical and spiral. Tecumseh Swift.... 115
getting rid of. S. T. Freeland..... 205
making room for. "Mechanic"..... 274
*rolling the. Morris Fulton..... 277
rolling the. A. Alertes..... 293
*from lathe and planer, helical. Morris Fulton..... 277
per hour, one ton of..... 819
*Chuck for drill work, a..... 30
*for punch work, a. J. L. Lucas..... 177
*friction drill tapping. Union Fire Co.'s 503
*Chucks for bicycle work, magnetic. O. S. Walker's..... 327
*special. Ed. Snyder..... 329
*lathe spindle. "Machinist"..... 382
split. "Machinist"..... 542
*Circle divider, Fischer's. Keuffel & Esser. 545
into degrees without protractor, to (158). 802
Circles on half-size drawings. C. C. H.... 666
Circular inch, the. Joel C. Robinson..... 98
Circulation in steam boilers, mechanical... 40
Clark, death of Alvan G..... 459
Classes in New York, evening..... 745
Clearance of cutting edges. J. T. Giddings. 118
Clocks, French. C. O. Griffin.....214
Club, an employés'..... 332
*Clutch, a new automatic friction. Automatic Friction Clutch Co.'s..... 24
Coal as fuel for steel workers, "pit." Geo. Rae..... 590
Coals, hygrometric properties of. Prof. R. C. Carpenter..... 420
Cocaine for the eyes..... 505
*Coils, the construction of armature. Wm. Baxter, Jr..... 493
Collars for shafting, sizes of. Raymond Decker, Wm. Sellers & Co., Geo. V. Cresson Co., Cumberland Iron & Shafting Co..... 59
*jig for drilling transverse holes through. A. H. Cleaves..... 138
formula for line shaft. C. E. Fawcett.. 259
*jig for transverse holes in. F. J. Woodhurst..... 514
Collision, cost of a railroad..... 140
Committees, management of a manufacturing establishment, by..... 226
Communicativeness, profitable..... 332
*Commutator insulation, armature and. Wm. Baxter, Jr..... 546
*Commutators, making and repairing. L. C. Sharpe..... 472
*Compass and rule, the circumference by. Cyrus T. Brown..... 819
Competition, an English view of American. 130
in railroad shops, promoting..... 957
Compound, a new welding..... 723
Compressed air in New York..... 62
air, a practical indorsement of..... 703
Compression of steam engine influenced by the speed, how is the point of (155). 801
*Compressor, Richard's automatic belt-driven air..... 28
horse-power of steam end of an air (5).. 41
size of air (41)..... 278
size of air (81)..... 406
*and receiver for the Hardie locomotive, high pressure air..... 430
get the air. Tecumseh Swift..... 740
a novel hydraulic air..... 850
*Computer, Cox's strength of gears..... 567
*Concavities, cutting semi-cylindrical. B. F. Spalding..... 342
Condensation, the laws of cylinder. Arthur L. Rice..... 421
Condenser, water required for a. W. H. Wakeman..... 265
Condensers, difference between surface and jet (155)..... 801
rules for computing size of (176)..... 967

Cost of trolley power..... 703
Cost-keeping system, an accurate. H. M. Norris..... 927
Cost, proportion of wages..... 948
Cotton mills in the South..... 219
press, waste of steam in a (122)..... 611
mills, electricity in. N. B. Smith Whaley..... 928
*Counterboring, brass. A. H. Cleaves..... 367
*Counting small articles with weighing scales. W. H. Sargent..... 292
*Coupling, improvised universal. Jas. F. Hobart..... 651
*Couplings, diagram of proportions for flange..... 716
*Crank-pin in an untrue hole, a true. F. Fuerste & Son..... 80
*Crank, keys hold a cracked. Wm. J. Silver 81
*over the center, helping the..... 131
*over the center, helping the. Morris Fulton..... 258
discs at 90 degrees, method of setting (23)..... 161
pins of compound engines at right or opposite give best results, do (94)..... 459
*shaft lathe, a marine. Bement & Mill's..... 452
pins, cause of heating of (153)..... 801
Cranks for small feed engines, correct setting of (90)..... 441
Credit for shop improvements. W. H. Chappell..... 60
Criticisms, fine work, fine tools, fine..... 478
*Crosshead pins, solid. Tecumseh Swift.. 14
*a simple. S. T. Freeland..... 171
*pins, as deduced from the records of experience, safe stresses for stationary engine mainshafts and. Henry Hess..... 268
pins, recipe for case hardening (97).... 479
key as a wrecker, a. A. L. Bowen..... 645
*Crossheads, piston rod fits in pistons and. J. H. Dunbar..... 699
Cube root, mental extraction of..... 370

PAGE

*Cupola taphole, daubing up a. Jas. F. Hobart..... 625
diameter of (159)..... 802
Cupolas, volume and pressure of air from foundry..... 298
*Current, the alternating. Lawford H. Fry. 958
*Custom vs. reason in the foundry. H. O'Neil..... 569
Customer, the touch of the..... 984
*Cutter-head, a reversible. Herman Fletcher's..... 35
*Cutter, a notable milling. Morse Twist Drill & Mach. Co.'s..... 231
*cutting correct worm gears with a single..... 391
*a surface milling. Francis H. Richards..... 417
nibbling worm gears with a fly. Geo. B. Grant..... 457
and reamer grinder, the. D. D. Donovan..... 591
*a large automatic gear. Gould & Eberhardt's..... 653
*grinder, improved Walker tool and. Norton Emery Wheel Co.'s..... 735
*a large gear. Newton Mach. Tool Co.'s 788
*the Eberhardt "Victoria" gear. Gould & Eberhardt Co.'s..... 867
*Cutters for boring bars. "Quirk"..... 291
*Nos. 4 and 5 for the great lakes, machinery of U. S. Revenue..... 287
*up-to-date gear. Gould & Eberhardt's 469
*cast iron milling. E. A. Gay..... 492
micrometer cuts for taps and milling. Tecumseh Swift..... 817
*Cutting-off tool, small. Walter Gribben.. 119
*Cut-off, the most economical..... 580
Cycle show, the New York..... 141
construction, some points in. F. J. Osmond..... 862
sixty miles an hour..... 745
*Cyclometer on a bicycle ridden by men of different weights, registration of (137)..... 706
*Cylinder walls for different pressures, thickness of. W. T. Sears..... 49
*boring machine, large. Niles Tool Works..... 324
